# Introduction

## Welcome to Ultimate Impostrip 2023.3.1

This is a small bug fix release of Ultimate Impostrip

Regards

The Ultimate TechnoGraphics Team

## News

### Windows Server 2012 and 2012 R2 are end of life.

<https://learn.microsoft.com/en-us/lifecycle/announcements/windows-server-2012-r2-end-of-support>

Please note the that above operating systems reached end of life at the end of 2023 and are no longer supported by Microsoft.

**The 2023 versions of Ultimate Impostrip are the last Impostrip versions to run on these operating systems, so we would advise any customers using them to upgrade before we release the Impostrip 2024 versions later this year.**

There are technology updates in this version will not run of these operating systems.

## 2023.3.1 Tickets and Fixes

TT6040	Fixed an issue where white hold back for all marks were output as Black when Built-in Marks on Black Only was selected.
TT6038	Fixed an issue where AutoFlow ignored Margins in some very specific circumstances.
TT5587	Fixed an issue where capital letters did not search templates correctly

## Other notable changes

In XML for Redirection, the 'scale attribute' for marks has been added to the XML for Redirection schema. This was not present and was reporting incorrect errors in the previous Ultimate Impostrip versions.

## How to get Technical Support

If you have an active Titanium Service Plan, get technical support by completing a form on our website to open a ticket. You may also submit feature requests here:

<https://imposition.com/support/> or email us at [techsupport@imposition.com](mailto:techsupport@imposition.com)

If you would like to renew your Titanium Support Plan, please contact [customerservice@imposition.com](mailto:customerservice@imposition.com)

## Ultimate Technical Services Team
